**Subject:** Gold King GeoPlatform Map

Hi Folks,

I don't know if it's of interest to you or other folks in the EOC, but I have created a web map in the GeoPlatform for viewing the surface water samples. It is not fancy by any means but the idea is that this would be embedded in the epa.gov/goldkingmine page as a simple spatial awareness tool rather than a jpg image from 1990, but I'm still waiting on something (I honestly have no clue what I'm waiting on at this point). That said, I have spoke with Harvey and the NCC GIS support folks and they are ready and willing to help us expedite the process of moving to web if we ever get to that point.

Anyway, anyone with an EPA LAN ID should be able to access it. If you have any issues or questions, please let me know.
